CONTENTS

Preface vii

INTRODUCTORY SESSION

Looking for hydrologic laws
J.C.I. Dooge (Galway, Ireland) 3
Summary of flood-frequency analysis in the United States
W.H. Kirby and M.E. Moss (Reston, Va., U.S.A.) 5
A general survey of flood-frequency analysis in China
S.-Q. Hua (Nanjing, P.R. of China) 15

DETECTION OF HISTORICAL FLOODS AND UNCERTAINTIES OF THEIR PEAK DISCHARGES AND TIMES OF OCCURRENCE

Quantifying peak discharges for historical floods
J.L. Cook (Atlanta, Ga., U.S.A.) 29
Investigation and regionalization of historical floods in China
C.-Z. Zheng (Nanjing, P.R. of China) 41
Errors in slope-area computations of peak discharges in mountain streams
R.D. Jarrett (Denver, Colo., U.S.A.) 53
Investigation and verification of extraordinarily large floods on the Yellow River
F. Shi, Y. Yi and M. Han (Zhengzhou, P.R. of China) 69
Paleoflood hydrology and extraordinary flood events
V.R. Baker (Tucson, Ariz., U.S.A.) 79
A comparison of the largest rainfall–runoff floods in the United States with those of the People's Republic of China and the world
J.E. Costa (Vancouver, Wash., U.S.A.) 101
Estimating rare floods by geomorphological methods
R. Xu and B. Ye (Nanning, P.R. of China) 117
Linear error analysis of slope-area discharge determinations
W.H. Kirby (Reston, Va., U.S.A.). 125
Extraordinary floods in early Chinese history and their absolute dates
K.D. Pang (Pasadena, Calif., U.S.A.) 139

FREQUENCY ANALYSIS OF ANNUAL FLOOD PEAKS WHEN EXTRAORDINARY FLOODS ARE PRESENT IN SYSTEMATICALLY GAGED FLOOD RECORDS AND WHEN HISTORIC FLOODS ARE DETECTED

The use of historical records in flood frequency analysis
J.V Sutcliffe (Reading, U.K.) 159
Problems in statistical treatment of flood series
G.-Y., Jin (Bengbu, P.R. of China) 173
Probability plotting position formulas for flood records with historical information
R.M. Hirsch (Reston, Va., U.S.A.) 185
Determination of confidence intervals for design floods
S. Hu (Nanjing, P.R. of China). 201
Use of historical information in a maximum-likelihood framework
T.A. Cohn (Reston, Va., U.S.A.) and J.R. Stedinger (Ithaca, N.Y., U.S.A.). 215
A discussion on the extrapolation of hydrologic series
J. Zhu (Tianjin, P.R. of China). 225

The effect of discharge measurement error in flood frequency analysis
S. Cong and Y. Xu (Nanjing, P.R. of China) 237
Regional regression of flood characteristics employing historical information
G.D. Tasker (Reston, Va., U.S.A.) and J.R. Stedinger (Ithaca, N.Y., U.S.A.) 255

USE OF STORM DATA IN DETERMINING DESIGN STORMS AND DESIGN FLOODS

Probable maximum precipitation for design floods in the United States
E.M. Hansen (Silver Spring, Md., U.S.A.). 267
Study of design storms in China
J. Wang (Nanjing, P.R. of China) 279
The deterministic approach to inflow design rainflood development as applied by the U.S. Bureau of Reclamation
A.G. Cudworth, Jr. (Denver, Colo., U.S.A.) 293
Analysis of the design storm time-intensity pattern for medium and small watersheds
W.C. Qian (Canton, P.R. of China) 305
Determination of design floods using storm data
E.A. Stallings (Washington, D.C., U.S.A.). 319
The role of uncertain catchment storm size in the moments of peak streamflow
P.S. Eagleson (Cambridge, Mass., U.S.A.) and Q. Wang (Wuhan, P.R. of China). . . . 329
A research on statistical estimation of storm transposition
W. Wang (Xian, P.R. of China). 345
A study of the relationship between storm rainfall and flood based on analysis of the "83.7" flood at Ankang in the Han River basin
Y. Feng and C.-C. He (Tianjin, P.R. of China). 355

GENERAL PRRESENTATIONS

The influence of variation in forest cover on design floods
Y. Liu (Changchun, P.R. of China) 367
Problems with outlier test methods in flood frequency analysis
S. Hu (Nanjing, P.R. of China). 375
